

Risk of sensory deficits drops with rising gestational age

18 July 2018

(HealthDay)—Compared to full-term children, there is an increased incidence of hearing loss and visual impairment among moderately- and late-preterm infants, according to a study published online July 17 in *Pediatrics*.

Mikko Hirvonen, M.D., from the Central Finland Health Care District in Jyväskylä, and colleagues compared the incidences of sensory impairments among very-preterm (VP;
